Network drives

With the help of the connection via the SMB protocol, university members can access the data drives of the PC network system of the Jade University of Applied Sciences with high performance - but **only within the campus**. This is done with the help of a file manager.

Microsoft Windows

Note: For devices in the PC network system, the drives are automatically connected.

Preparation:

- Start / Computer: Properties / Settings for computer name, domain and workgroup / Change settings.
- Change / Member of: Workgroup: HS-WOE
- Restart the computer

(Windows-) Explorer / Network / Right Mouse Button: Connect Network Drive...

- **Data drive X:**
  - Drive: X:
  - Folder: \\hs-woe.de\data
  - Establish connection with other login information: activated
  - Windows security / username: domain login (form: ma1150@hs-woe.de)
  - Save login data
- **Home drive Z:**
  - Drive: Z:
  - Folder: \\hs-woe.de\home\c1\<your username>
    - Example: \\hs-woe.de\home\c1\ma1150
  - Establish connection with other login information: activated
  - Windows security / username: domain login (form: ma1150@hs-woe.de)
  - Save login data

Apple OS X

Finder / Connect to Server

- **Data Drive**:
  - Server address: smb://hs-woe.de/data
  - Connect as registered user / name: domain login (form: ma1150@hs-woe.de)
  - Save password in keychain
- **Home drive:**
  - Server address: smb://hs-woe.de/home/c1/your username>
    - Example: smb://hs-woe.de/home/c1/ma1150
  - Connect as registered user / name: domain login (Form: ma1150@hs-woe.de)

- Save password in keychain

Ubuntu Linux

Preparation:

```
# Installation of the Samba client
sudo apt install smbclient
