Pool Rooms

The University Computing Centre (HRZ) is responsible for the three university study locations:

- **28 Pool rooms with 441 workplaces.**
  - PC-Pools Elsfleth
  - PC-Pools Oldenburg
  - PC-Pools Wilhelmshaven

These workstations are equipped with the Windows 11 operating system and have access to the software offered via the Software Distribution. The pool rooms are assigned to Multifunctional Devices and Plotters. The pool rooms intended for lectures are additionally equipped with a projector and some with Media Control.

All pool rooms operated/supervised by the university computer center are integrated into the central, multifunctional and cross-study location PC network system of the Jade University. The technical implementation of this PC operating concept has numerous functions, such as

- Automated Software delivery
- Identical menu system at all study locations
- Identical drive concept for all users
- Cross-group and cross-location workgroup functionality

Access to the pool rooms operated or supervised by the HRZ or the PC workstations provided there is possible without restrictions during the opening hours of the university buildings. The opening hours of the buildings can be found below the respective Study location

Note:

- Please note that you can only use software from our software menu in the pool rooms operated by the HRZ. Due to the functionality of the system for all users, you cannot install your own software.
- It is not possible to lock a workstation in the pool rooms operated/managed by the HRZ, as the workstation cannot be unlocked by the next user. Therefore, always log out.
- The pool rooms operated/supervised by the HRZ are updated with a current operating system image every semester break. For this purpose, the HRZ enters a corresponding date in the event planning. Please note this date when planning your courses.

The service group supports the following services:

Media Systems

This service is responsible for the operation of the media control from the company Extron and the projectors.

Video Control

This service is responsible for video control in some pool rooms.
