Pools

The provision of virtual desktops always takes place in so-called pools. The provision of virtual desktop pools is based on organisational and technical characteristics.

Depending on the status (staff member or student) and organisational unit (department/administration/central institution), one or more virtual desktop pools are offered.

The following general conditions apply to all virtual desktop pools:

- Any virtual desktop from the pool is assigned when logging in.
- Individual settings of the logged-in user are automatically saved when the user logs off and restored when the user logs on again.
- The users are assigned locally to the “Users” group
- Users can use all software products provided via the start menu
- Installation of own software products is not possible

List of virtual desktop pools currently available

011: HRZ

- Number of virtual desktops: 10
- GPU support: No
- Description: VD pool for staff of the University Computer Centre

020: StA

- Number of virtual desktops: 15
