eduVPN

We offer EduVPN as our VPN solution. This is a type of VPN management client that allows you to connect to our VPN solution easily and seamlessly. To use the VPN, you must download the client for your operating system; the program is available for all major systems.

Explanation of VPN - Virtual Private Networks (BSI)

The user interface is similar across all systems and offers the same services regardless of the device type.

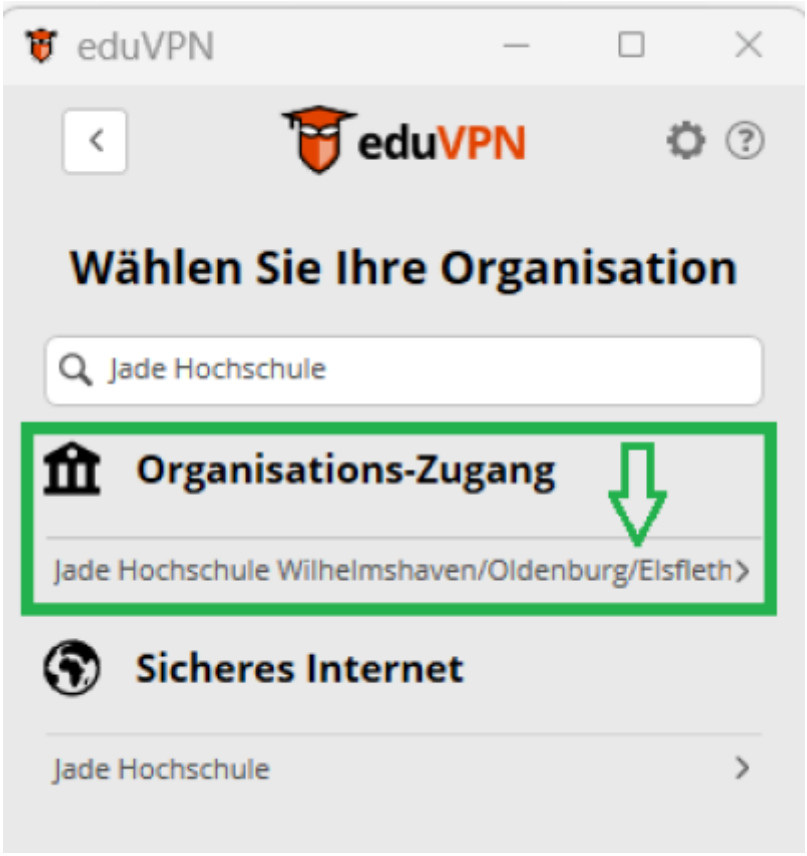

To establish a connection, you need an MFA token (multi-factor authentication), which you can create as described in the MFA instructions.

To establish a connection with the VPN, follow these steps:

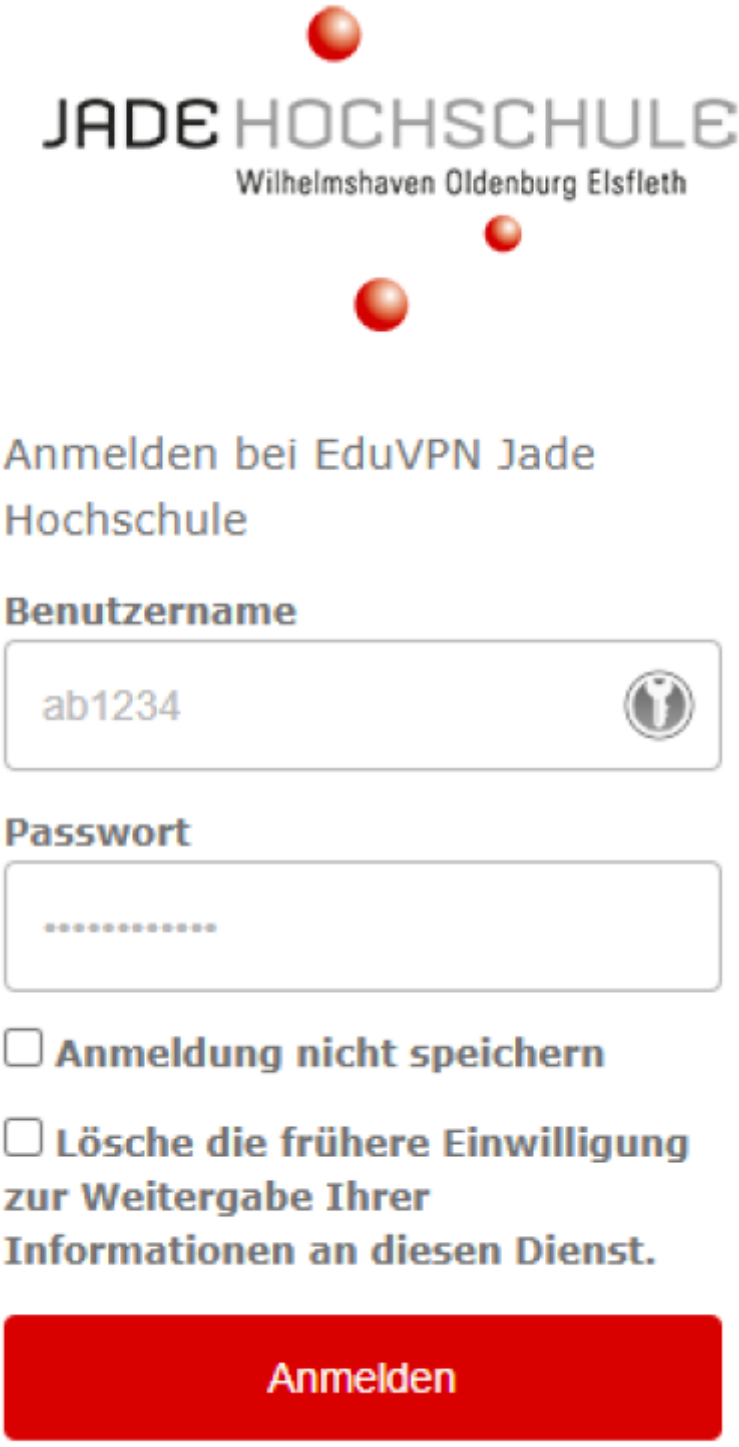

Step-by-step instructions:

- You must first set up educationMFA (multi-factor authentication): MFA instructions
- Download the eduVPN program: EduVPN Client
- Select your operating system (Windows, Apple, Linux) and download
- Install the app
- Open the app on Windows via “Start/eduVPN”
- 

- Search for **Jade University of Applied Sciences**

- In the **Organization Access** tab, click on **Jade University of Applied Sciences Wilhelmshaven/Oldenburg/Elsfleth**
- You will be redirected to the login page

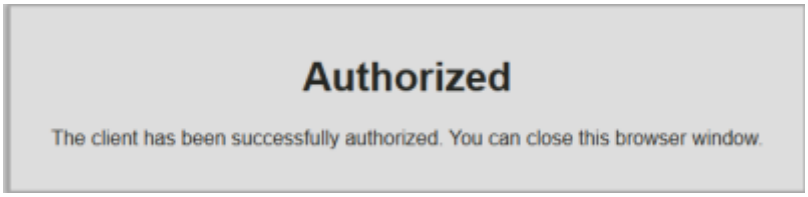

- Enter your **usual login credentials** (format: ab1234)

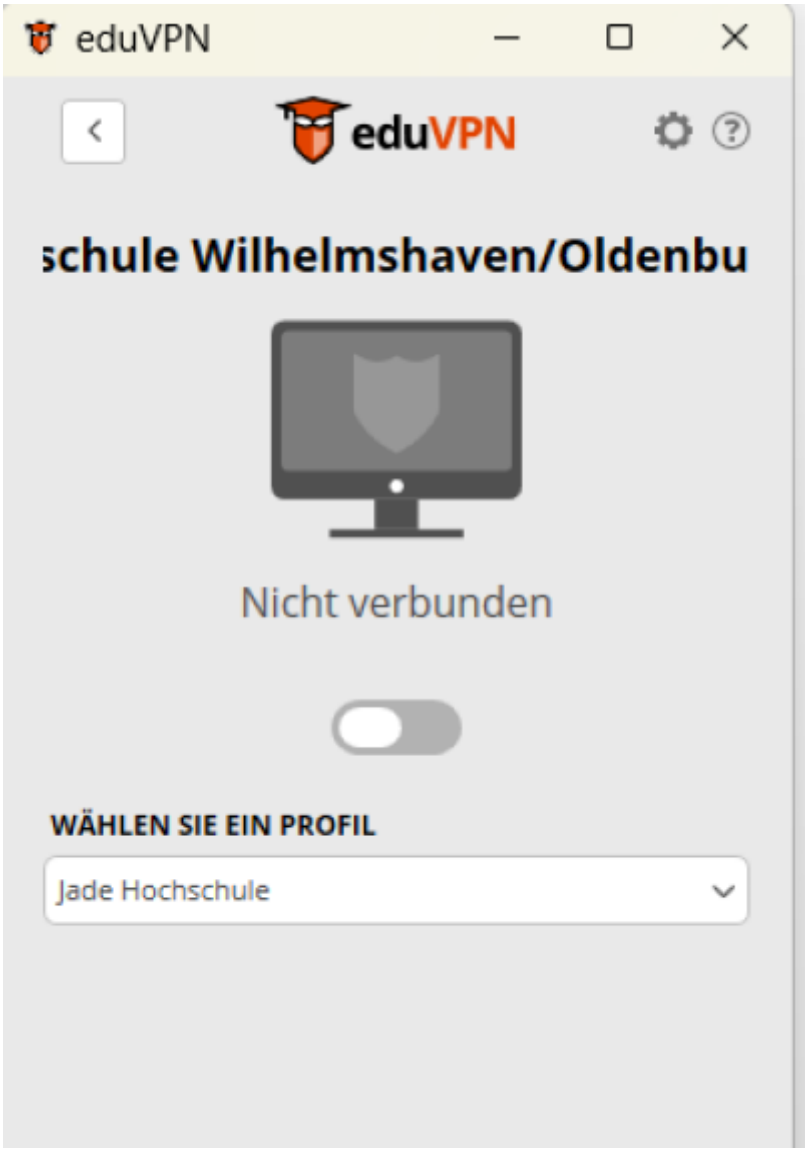

- Confirm via **MFA login**

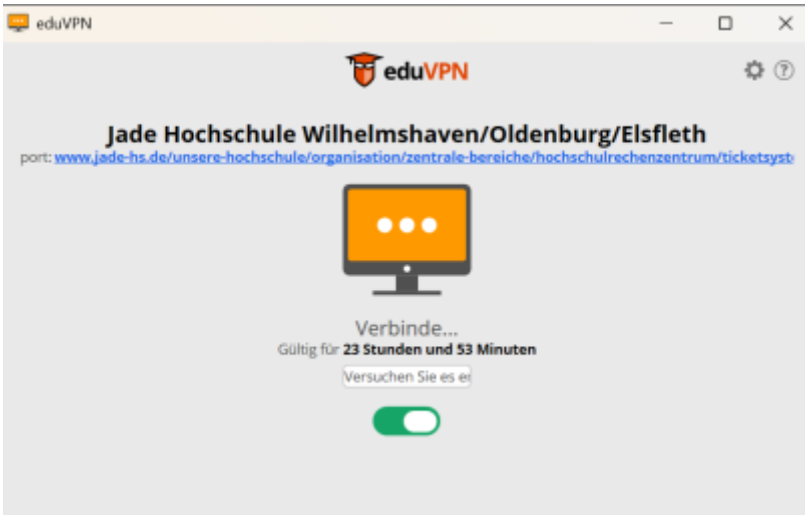

- **Approve** access from eduVPN

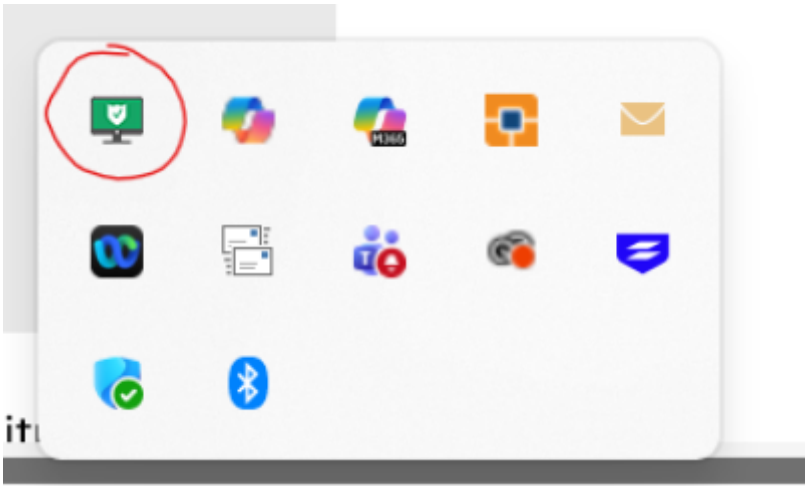

- After successfully logging in, profiles will be displayed in the eduVPN app
  - Profile: **Jade University of Applied Sciences**
    - Default access profile
    - In this case, all your network traffic is routed through Jade University
- Tap the gray button to connect and wait a moment

- Successful connection in the taskbar:
